Senzing - The First Real Time, Plug n Play AI for Entity ...

Entity Resolution Software. The puzzle of entity resolution, where duplicate records are resolved and merged together in order to identify a specific entity of a person, place, or a thing, is a common challenge in the business world.

Home - Entity Resolution

The problem of named entity resolution is referred to as multiple terms, including deduplication and record linkage. I doubt that it is possible to determine precisely, what software belong to some of the most popular for solving that problem. There are various approaches and algorithms can be used for named entity resolution.

Popular named entity resolution software - Stack Exchange

Entity resolution software for big data is a powerful tool to help businesses sort through complex, large data sets and organize that information in a coherent, usable manner. By leveraging entity resolution, organizations like yours can make connections faster and use those connections to drive better business decisions.

What Can Your Entity Resolution Software Do for You ...

Entity resolution and analysis (ER&A) leverages many aspects of data integration, master data management (MDM) and data quality management, and eventually becomes instrumental in the success of each of these practices. Additionally, all four of these disciplines (that is, data integration, MDM, data quality management and ER&A) make up a ...

Entity Resolution and Analysis (ER&A) - Gartner IT Glossary

The goal of the SERF project is to develop a generic infrastructure for Entity Resolution (ER). ER (also known as deduplication, or record linkage) is an important information integration problem: The same "real-world entities" (e.g., customers, or products) are referred to in different ways in multiple data records.

Stanford Entity Resolution Framework
